

**Penny Simmonds**  
Chief Executive of Southern  
Institute of Technology

“ It is with great pleasure I write this message acknowledging the agreement between the Southern Institute of Technology (SIT) and one of Sri Lanka’s leading tertiary institutions, PATHE Global Campus. The agreement will open up stair casing opportunities for PATHE graduates allowing them to have advanced standing to SIT’s degrees in Commerce, Applied Management and Hotel Management. SIT is a New Zealand government owned Institute of Technology that offers applied, practical learning. We help our students gain essential skills that are needed by enterprises in today’s competitive world.

PATHE Global Campus diploma graduates that meet the entry criteria to SIT’s degrees will be offered a place of study at our campus in Invercargill, which is located in the scenic Southland region of New Zealand. This will allow the students to not only gain an internationally recognised qualification but also

valuable work experience for a further year upon successful completion of their studies.

We are excited at the prospect of welcoming PATHE students to New Zealand. We know they will add value and diversity to our student body, Institute and greater Southland community”
